

Glitzy Bicycle Wheel Flashing Light

There is no reason to stop riding your bicycle once the sun goes down. With this jazzy, [glitzy bicycle wheel flashing light](#) attached to your bike and the right attitude, you can extend your riding time even after the sun goes down.

80s Feel:

The bright neon colors (red, blue, and green) powered by 32 LEDs alternate between colors and give you that flashy 80s lighting feel. The dazzling lights are bound to catch the attention of any passerby vehicle, making you visible to them and hence, safe.

Disco Feel:

These aesthetically pleasing bicycle wheel flashing lights even change patterns (like disco lights) when riding at 20 Kms/hr, making them look fancier.

Easy Assembly:

You can install your glitzy bicycle wheel flashing light in three simple steps.

1. Insert three AAA batteries into the battery compartment.
2. Snap the bike spoke card slots onto your wheel wire till you hear a click.
3. Fasten the bolts to the wire.

The bicycle fits on Wheels of All Shapes and Sizes:

This bicycle wheel flashing light does not discriminate. It is a perfect fit for all bicycle models and wheels. Giving them all that much needs bling.

Twice the Fun:

While getting this jazzy bicycle wheel, a flashing light for one wheel of your bicycle will make it flashy; getting two for both wheels will make your ride downright ostentatious.

To Sum It Up:

These flamboyant bicycle wheel flashing lights will allow you to ride in style while staying safe.
