Download Yamaha Xg Midi Player. Page 4. Yamaha Xg MIDI Player - best software for Windows - YouTube. Yamaha Category: Musical instrumentsQ: Find each element that contains a file (uploaded from a server) in a directory I am trying to build a script where for each file that contains the string:'music'. I want to use this file and upload it to the server in a specific folder. In short this is what I have: \$dir = Get-ChildItem \$env:USERPROFILE\Documents\Music* -File \$files = \$dir | Select -ExpandProperty Fullname foreach (\$file in \$files) { \$new = (Get-Item \$file.FullName).FullName If (\$new -match "music") { \$newlocation = \$clientScriptPath + "\upload\music" \$File.Move(\$newlocation) } } I am not able to check if the file does not contain the string "music". I have been searching for a way to do this, but have not been able to find an answer for my problem. A: Assume you had a directory like this: c:\myfiles |-----myMusic |-----2.mp3 | |-----3.mp3 | |-----4.mp3 |-----multimedia |-----music | |-----song.mp3 | |-----suicide_song.mp3 | |-----video.mpg |-----otherstuff |-----file1.txt |-----file2.txt |-----file3.txt then you could use something like this: \$path ba244e880a
