===== ASIOWmpPkg is a media plugin for Windows Media Player that provides a virtual Media Player as a kernel driver and provides an ASIO port to the Realtek ASIOService. It also supports an optional service so you can enable your Realtek card as a recording device in Windows Media Center. The plugin handles the player's hotkeys. You can use the key to control the volume, seek, pause, stop, forward, back, play, etc... Installation: ===== - Unzip the file to any directory and run the.exe file to install. - Add ASIOWmpPkg.dll to the Microsoft Plugins folder in Windows and set it as the default plugin. - Open the Plugins manager and delete the existing plugins and load the new plugin. - In Windows Media Center, in the Options, go to the Audio tab and select ASIOWmpPkg. - Run the player. You can also control your device using the keyboard hotkeys provided in the ASIOWmpPkg config file or via the system tray icon. Supported Hardware: ===== - Audio hardware that is compatible with the ASIO4ALL driver. - USB audio controllers should work. - Realtek RTL888/RTL871/RTL867/RTL867U/RTL871U/RTL873U should work. - The device name is: [YOUR_DEVICE_NAME] asio in /dev/asio. - Example: -- ASIO name: [LABEL-RTP-AC-2] asio. -- i.e. "[LABEL-RTP-AC-2]" ASIO name. - This plugin is compatible with the Windows XP Media Center Edition (ME). - If you have a Windows Vista or later version, you should use the ASIOVMW.dll instead. - To support Windows Media Center, the plugin needs to be in the Plugins folder in the same folder as the device driver. Re: Windows Media Player 11 "My Media" Plugin I have the same issue as you. I am using VMWare player on Windows 7 and when I use VMWare, the audio works fine. When I run it natively, the audio will work fine until you hit mute, then nothing works and the audio will stop. Does anybody
