

Flexible Neck Reading Light – Good Bye To Dry Eyes

Let's admit it: the light from your devices has been the reason for your eye fatigue. Blame it on screens or the lack of sleep, but either way, it's time to get some relief. Introducing—the [Flexible Neck Reading Light](#).

With this product, you'll be able to read comfortably in any position-no without more worries about how to hold your phone or tablet at just the right angle! Say goodbye to strain and dry eyes; this is one app you don't want to miss!

Three Color And Six Brightness Modes Are Adjustable:

Yellow (3000K), warm white (4000K), and cold white (6000K) (6000K). Each head has its switch with three controllable brightness levels. For example, you can choose a pleasant location for reading, crocheting, camping, or repairing.

Rechargeable And Long-Lasting:

USB Type-C is rechargeable, reversible, and easier to plug in than other Micro-USB connectors. The bundled quality rechargeable 1000mAh battery provides up to 80 hours (general read, single head) of intense, non-diminishing brightness.

Eye Care & Ergonomic Design:

Advanced LED beads with no flickering and a blue light filter. Eye strain is no longer an issue for both children and adults. The arms are flexible and adjustable, allowing you to choose the most comfortable angle. It has an ergonomic neck-around design and is completely hands-free!

Partner-Friendly:

Special beamwidth angle design (90°). It is bright enough to illuminate the area where you have placed it while remaining dim enough not to disturb your deep-asleep mate.
